

GRP sheet of glass-reinforced polymer of thickness of 1mm 2mm

A. What is FRP sheet

Also known as GRP sheet, whose full name is fiberglass reinforced polyester (plastic) sheet with coated gel. As a new material, greater than that of steel products and aluminum products in specific toughness. Products at ultra low temperature or high temperature will not occur breakage brittle, deformation and to prevent heat transfer. For this, the FRP is widely used in so many sectors. Such as the outer skin of the bus / coach, the wall decoration cover, the refrigerated truck body, the side panel of playground / motor, the wall of the refrigerator compartment etc.

B. Characteristics of the FRP sheet

1. High mechanical strength and good impact resistance;
2. Surface roughness and easy to clean;
3. Corrosion resistance, wear resistance, yellowing resistance, anti-aging;
4. Resistance to high temperatures;
5. No deformation, low thermal conductivity, excellent insulation properties;

C. FRP sheet details

FRP surface					
Pattern	Pebbled	Cloth-based	Anit Slip	Add surface rug	Matt
					
Cheaper Show little fiber glass grain on the surface	Cheaper Widely used in wall decoration	Stronger Show the grain of fiberglass cloth on the surface	Anti slip Widely used in antiseptic floor	More melancholic and very light fiberglass grain	Custom and the most expensive type of surface

D. Package & Delivery

Package	Delivery
1. Common roll package	1. Samples: 2-3 dyas
2. Packaged in plywood pallet	2. Mass production: 7-15 business days after receiving payment
3. Packaged in plywood case	3. Terms of delivery: EXW, FOB, CIF, DDP all can be accepted

E. FRP sheet applications

1. Wall cover & External skin of the trainer
2. Sandwich panel skin material
3. Refrigerator Van & Truck Body
4. Sentry box & Mobile Toilets
5. Caravan & RV
6. & Partition wall
7. Sheep Shed & Dog kennel

F. Factory Profiles

Foreth Industrial Co., Ltd is a fast developing company which is mainly specialized in plastic coated fiber (FRP) products and operates in a global market. Foreth's team provides customers with FRP sheets, FRP sandwich FRF grids, composite roofing, FRP profiles, FRP roof sheets, etc., with a wide range of applications throughout the construction, marine, off road, rail, water treatment and engineering.

Moreover, we have extensive experience in exporting and supplying high quality products and excellent service.

Please feel free to contact us if any inquiry you may have and we will be happy to assist you. We hope to be your reliable supplier & stable partner setting up a lot of time as well as a joyful business relationship with your esteemed company!

WHY CHOOSE US

Foreth Industrial Co., Ltd. is a rapid development of enterprises, mainly Specializing in glass fiber reinforced plastic (fiber reinforced plastic) products and in global market. We have been in the glass fiber reinforced plastic industry for 15 years.
