High Strength Anti-corrosion Fiberglass Reinforced Plastic GRP FRP Roof Purlin Manufacturer

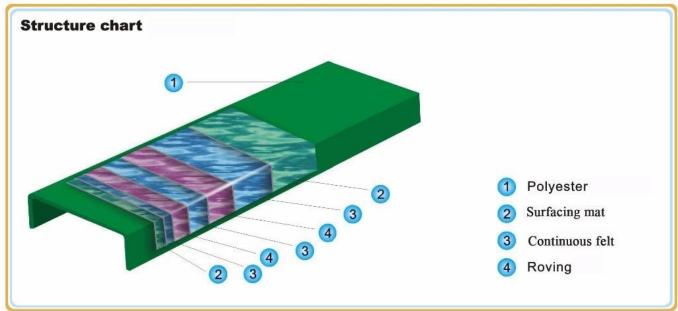

A. FRP Roof Purlin Introduction

FRP Roof Purlin made from Fiberglass reinforced Plastic by pulextruded processing.

Most competitive characters of our FRP purlin:

- A. The axial strength of our FRP purlin is 290Mpa which has reached the strength of steel.
- B. With excellent anti-corrosion and anti-aging performance, no other materials can replace it under the same "performance-price ratio ".
- C. We promise 15 years warranty

FRP Purlin is most valuable innovation in recent years. As a leading company in China composite industry, Fore core competitive advantages are technologically innovative capability, product customization to suit market demands, and the industrialization of technological products. Fore owns a reputation as "A Chinese Manufacturer which own Europen Technological Level" awarded by foreign engineer in this filed.

B. FRP Roof Purlin Features

- Light Weight Less Density 20% Of Steel; 70% Of Aluminum Values
 - · High Corrosion Resistance
 - Variety Of Colors For Choice
 - Wide Temperature Range Use

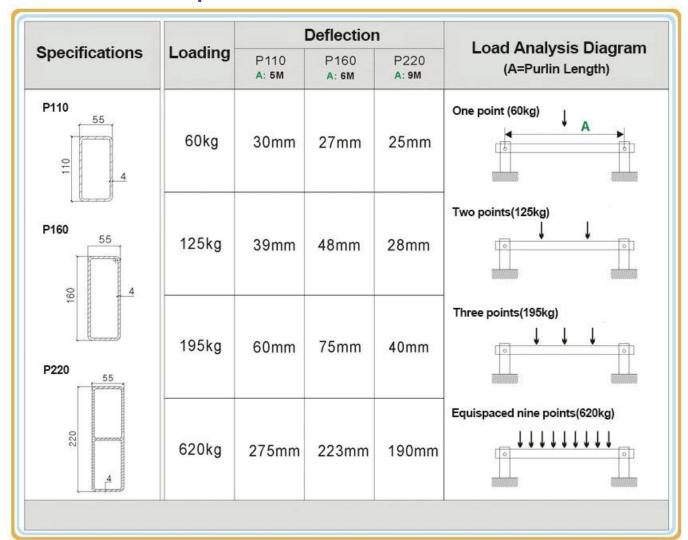

- · High Strength And Insulating
- UV Resistant Inhibited
- Superior Dimensional Stability
- Consistent Cross Section

- Excellent Structural Properties
- Non-Conductive Thermally And Electrically
- Non-Magnetic Electromagnetic

Installation

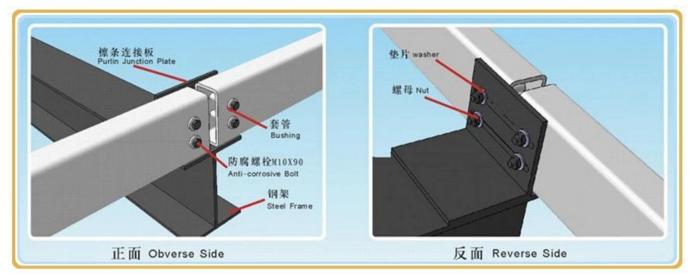

- Environmentally Safe
- Dimensional Stability
- Ease Of Fabrication &

C. FRP Roof Purlin Specifications & Technical Data

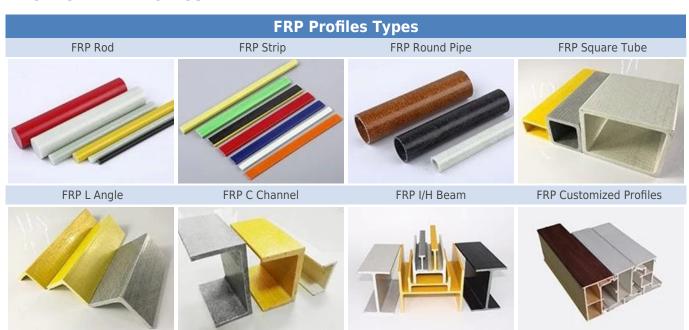

Foreth have tested repeatedly and seriously to verify the data above, but which is not our guarantee of the specific application of FRP purlin. All technical datas should base on the specific requirement and condition.

D. Installation of FRP Purlin

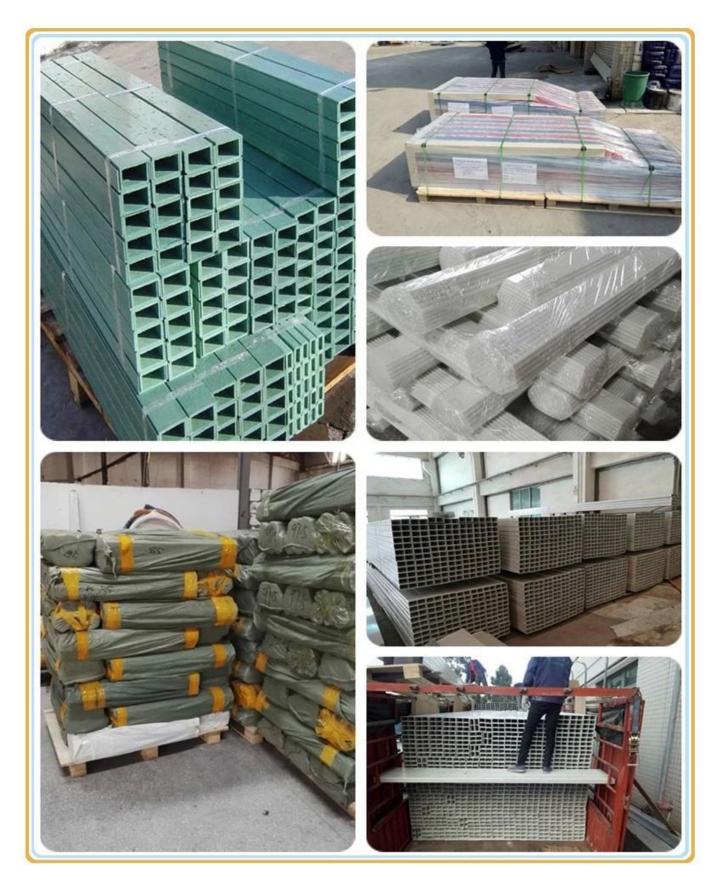

- 1. Drill the purlin for installing bushings
- 2. Install the bushings(which provide by FORE)
- 3. Use anti-corrosive bolt, the junction plate, washer and nut to fasten FRP Purlin

E. Other FRP Profiles

F. Package & Delivery

Package	Delivery
1.Packed on plywood pallet	1. Samples: 2-3 dyas
2.Packed in plywood case	2. Mass production: 7-15 working days after receive payment
3.Load in container directly	3. Delivery terms: EXW. FOB. CIF. DDP all can be accepted

G. FRP Profiles Applications

• **Electrical fields:** cable bridge, ladder, stents, insulation ladder, the transformer block bar, the motor wedge, lampposts,

the third rail circuit board, fiber optic cable core materials.

• **Chemical & anti-corrosion areas:** FRP sucker rod, cooling tower support, offshore oil production equipment channels,

walking grille, staircase handrails and stents, chemical corrosion environment of the structural support.

• **Entertainment areas:** fishing rods, rods, umbrellas skeleton, flagpoles, lampposts, railings, handrails, stairs, radio

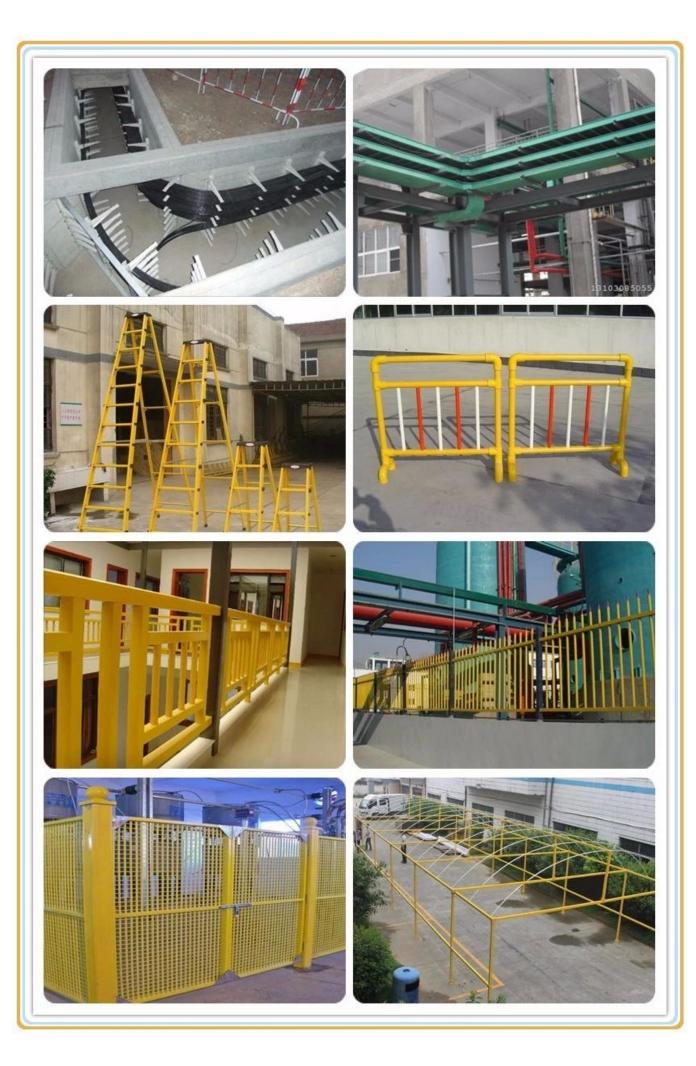

antennas, marinas and so on.

• **Public transport areas:** barriers on both sides of the highway barrier, road signs, pedestrian bridge, sound insulation walls

refrigerated trucks and other components.

• **Agricultural areas:** livestock rings, poultry houses with wall fence, greenhouse structure, support components, rattan shed,

water trough etc.

H. Factory Profiles

Foreth Industrial Co., Ltd is a fast-developing enterprise which is mainly specialized in FRP(fiber reinforced plastic) products, and operates in a global marketplace. Foreth team supply clients with FRP sheets, FRP sandwich panels FRP gratings, composite manhole covers, FRP profiles, FRP roofing sheets etc, with a wide range of applications across the construction, marine, off highway, rail, water treatment and engineering industries.

Additionally, we have rich experience in exporting and supplying high quality products and excellent service.

Feel free to contact us if any query you may have and we will be happy to assist you. We hope to be your reliable supplier & stable partner by establishing long time as well as joyful business relationship with your esteemed company!
