

Pultruded Round Square Rectangular Fiberglass Reinforced Plastic GRP FRP Tube Suppliers

A. Fiberglass Reinforced Plastic GRP FRP Tube Introduction

FRP pultruded profiles have so many types, Such as fiberglass pipe, fiberglass pipe, glass steel rectangular pipe, fiberglass rods, fiberglass beam etc.

The basic components of the FRP profiles for resin and glass fiber (including cloth, carpet, etc.), which is based fibers (including glass fibers, carbon fibers, organic fibers and other metals, non-metallic fiber) as reinforcing material, resin (mainly epoxy polyester resins, phenolic resins) as crosslinking agent and other auxiliary materials supplemented (main materials: mold release agents, curing agents, catalysts, sealing mold agents, UV light stabilizers, mold clean water, gel coat and other) composite made of. It has a high temperature, corrosion resistance, high strength, low specific gravity, low moisture absorption, extending small and good insulation and a series of excellent properties. Widely used for mechanical structure, insulation, high-frequency mechanical parts and other functional structural components.

Structure chart

B. Fiberglass Reinforced Plastic GRP FRP Tube Features

- Light Weight - Less Density - 20% Of Steel; 70% Of Aluminum Values
- High Corrosion Resistance
- Variety Of Colors For Choice
- Wide Temperature Range Use
- Excellent Structural Properties
- Non-Conductive Thermally And Electrically
- Non-Magnetic Electromagnetic Installation
- High Strength And Insulating
- UV Resistant Inhibited
- Superior Dimensional Stability
- Consistent Cross Section
- Environmentally Safe
- Dimensional Stability
- Ease Of Fabrication &

C. FRP Profiles Types

FRP Profiles Types			
FRP Rod	FRP Strip	FRP Round Pipe	FRP Square Tube

FRP L Angle

FRP C Channel

FRP I/H Beam

FRP Customized Profiles

D. Package & Delivery

Package

- 1.Packed on plywood pallet
- 2.Packed in plywood case
- 3.Load in container directly

Delivery

1. Samples: 2-3 days
2. Mass production: 7-15 working days after receive payment
3. Delivery terms: EXW, FOB, CIF, DDP all can be accepted

E. Fiberglass Reinforced Plastic GRP FRP Tube Applications

- **Electrical fields:** cable bridge, ladder, stents, insulation ladder, the transformer block bar, the motor wedge, lampposts, the third rail circuit board, fiber optic cable core materials.
- **Chemical & anti-corrosion areas:** FRP sucker rod, cooling tower support, offshore oil production equipment channels,

walking grille, staircase handrails and stents, chemical corrosion environment of the structural support.

- **Entertainment areas:** fishing rods, rods, umbrellas skeleton, flagpoles, lampposts, railings, handrails, stairs, radio antennas, marinas and so on.

- **Public transport areas:** barriers on both sides of the highway barrier, road signs, pedestrian bridge, sound insulation walls refrigerated trucks and other components.

- **Agricultural areas:** livestock rings, poultry houses with wall fence, greenhouse structure, support components, rattan shed, water trough etc.

F. Factory Profiles

Foreth Industrial Co., Ltd is a fast-developing enterprise which is mainly specialized in FRP(fiber reinforced plastic) products, and operates in a global marketplace. Foreth team supply clients with FRP sheets, FRP sandwich panels FRP gratings, composite manhole covers,FRP profiles, FRP roofing sheets etc,with a wide range of applications across the construction,marine,off highway,rail,water treatment and engineering industries.

Additionally, we have rich experience in exporting and supplying high quality products and excellent service.

Feel free to contact us if any query you may have and we will be happy to assist you.We hope to be your reliable supplier & stable partner by establishing long time as well as joyful business relationship with your esteemed company!

WHY CHOOSE US

Foreth Industrial Co., Ltd. is a rapid development of enterprises, mainly Specializing in glass fiber reinforced plastic (fiber reinforced plastic) products and in global market. We have been in the glass fiber reinforced plastic industry for 15 years.
